Program Directions

Here is how today’s version of speed mentoring/coaching is going to work. Each professional mentor will be seated at a table, and will remain at this table throughout the speed-coaching portion of this session. Five seats will be placed at each of the 10 tables for students to sit and meet each professional.

Every 6-8 minutes, students will move to a different table after a designated signal to meet a new professional mentor and learn more about their profession, leadership skills, and ask questions.

This process will repeat a number of times until each student has an opportunity to meet each of our 10 special guests. It is fast, fun, and fulfilling as everyone will meet new people and gain new insights.
